Projects

- [EUCAN-CONNECT](#) — A federated FAIR platform enabling large-scale analysis of high-value cohort data connecting Europe and Canada in personalized health (H2020-SC1-2018-Single-Stage-RTD, 824989, 1st January 2019 - 31st December 2023)
- [C4G](#) — Colaboratório para as Geociências (FEEI/FCT-01/SAICT/2016/22151, 15th June 2017—11th June 2021)
- [MELOA](#) — Multi-purpose/Multi-sensor Extra Light Oceanography Apparatus (H2020-SC5-2016-2017-RIA, 776825, December 2017 - February 2022)
- [e-WindLidar](#) — Making lidar data FAIR, (IRPWIND WP3 — Lidar Data Modelling and Architecting Web Platform, Grant agreement nº 609795, July 2017 - January 2018)
- [windscanner.pt](#) — Infraestrutura Nacional WindScanner (NORTE-01-0145-FEDER-022207 (PINFRA/22207/2016), 23rd October 2017 - 20th October 2021)
- [RECAP preterm](#) — REsearch on Children and Adults born Preterm (H2020-SC1-2016-RTD, 733280, January 2017 - September 2021)
- [TAIL](#) — Research data management from creation to deposit and sharing (PTDC/EEI-ESS/1672/2014, POCI-01-0145-FEDER-016736, 30th May 2016 - 30th November 2019)
- [iCare4Depression](#) — I Care for Depression: Blending face-to-face psychotherapy with internet and mobile digital solutions (PTDC/MHC-PCL/1991/2014, POCI-01-0145-FEDER-016840, 1st June 2016 - 29th February 2020)
- [NEWA](#) — New European Wind Atlas Joint Programme (ERA-NET Plus, topic FP7-ENERGY.2013.10.1.2, NEWA/0001/2014, 1st March 2015 - 28th February 2020)
- [E-COMPARED](#) — European-COMPARative Effectiveness research on online Depression (FP7-HEALTH.2013-INNOVATION-1, 603098, 1st January 2014 - 30th June 2016)
- [WindScanner.eu](#) — The European WindScanner Facility (FP7-INFRASTRUCTURES, 312372, 2012 - 2015)
- [TICE.Mobilidade](#) — Sistema de mobilidade centrado no utilizador (SI IDT—13843/2011, 2011 - 2014)
- [EcoPlanner](#) — Plataforma de gestão ecoeficiente (SI IDT—13085/2011, 2011 - 2013)
- [MOBILES](#) — MOBILidade Eléctrica Sustentada (SI IDT—5730/2009, 2009 - 2011)
- [ICT4Depression](#) — User-friendly ICT Tools to Enhance Self-Management and Effective Treatment of Depression in the EU (FP7—248778, 2010 - 2012)
- [ROBOTVIGIL](#) — Robot Vigilante (SI IDT—7905/2010, 2010 - 2011)
- [ILP-Web-Service](#) — Um serviço web baseado num sistema de indução de programas de lógica (PTDC/EIA/70841/2006, 2008 - 2010)

- [DBPreserve](#) — Data Warehouses for the Long-term Preservation of Institutional Electronic Records and Databases (PTDC/CCI/73166/2006, 1st October 2007 – 31st December 2009)
- [MEDSI](#) — Management Decision Support for Critical Infrastructures (IST—506991, 2005 – 2006)

INESC Porto

Since 19th June 1985, I'm doing research at [Instituto de Engenharia de Sistemas e Computadores](#) (INESC Porto) in Information Systems, Databases and Software Engineering. At the moment I'm a researcher of [Information and Computer Graphic Systems](#) (USIG).

Computing Science Department, University of Glasgow

From October 1991 to January 1995, I was doing research in Persistent Programming, in the FIDE project, [University of Glasgow](#), [Department of Computing Science](#), working in my PhD in the [Persistence and Distribution Group](#).

PhD Thesis

My PhD degree in Computing Science was awarded in June 1997 by University of Glasgow.

Title: An Architecture for the compilation of Persistent Polymorphic Reflective Higher-order Languages

Supervisor: [Malcolm Atkinson](#)

Thesis: My thesis is that an intermediate representation designed to enable high level optimisations and easy code generation can effectively support persistent reflective higher-order polymorphic languages in the context of Scalable Persistent Foundations, namely that it supports longevity, safety and persistence. This was demonstrated by presenting an initial design of such a compilation system and identifying and validating its crucial features by prototyping.

You may have a look at the [Abstract](#), or [Bibliography](#) (41kB,_ps.gz).
