

Rules and Scheduling of Presentations

Master in Informatics and Computing Engineering
Database and Web Applications Laboratory
Instance: 2019/2020

Delivery

The delivery of the final project will take place as defined in [Product and Presentation \(A9\)](#), **before the deadline**, in [Moodle](#).

The Product to be used in the demonstration must be installed in the production machine (<http://lbaw20gg.lbaw-prod.fe.up.pt>). The uploading of the docker images to the production machine will **stop at the final deadline**.

The delivery of the Presentation will take place as defined in [Presentation and discussion \(A10\)](#), **before the deadline**, in [Moodle](#).

Demonstrations

The demonstration of the product will be held in the rooms and according to the **schedule presented below**.

Students must be in the room at the beginning of the **presentation block** in order to avoid disturbing the other groups while leaving and entering the room.

The demonstrations must follow a script, previously prepared by the group to demonstrate the **most relevant** implemented features and have a maximum duration of 20 minutes: 15 minutes for the demonstration and 5 minutes for questions from "potential customers".

The demonstrations should be performed using a web browser in the computer available in the room and use the product installed at lbaw-prod.fe.up.pt.

For future reference, the promotion of the product (A11) must include a link to the developed application (the product pre-installed in the lbaw-prod.fe.up.pt production machine) and a link to a 2 minutes video with a demo of the main features implemented.

The order of the demonstrations will follow the schedule presented below.
